Clinical Radiology Curriculum Mapping and Implementation – 2015

Current Curriculum – changes and transition arrangements

2015 Curriculum – changes from the previous (2014) version

Minor changes have been made to the specialty specific content to ensure currency and relevance in line with current practice; the Quality Improvement sections of the generic content have been revised; all Behaviours sections within the speciality specific content have been standardised and the ARCP grid has been restructured and reworded for clarification.

Transition mapping from 2014 to 2015 curriculum

Only minor adjustments to training are to be expected from these revisions; the structure of training and assessment is unchanged and there are no additional assessment requirements to be considered. Therefore, all trainees are required to transfer to the 2015 curriculum from their next ARCP after 1 February 2016. They will not be required to revisit or repeat training in any core, level 1 or level 2 radiology topics.

Previous Curricula

Details of the changes to previous versions of the curriculum and the mapping and implementation requirements can be found on our website along with the previous curriculum versions.
