First Examination for the Fellowship in Clinical Radiology

Guidance Notes for Candidates

1 Examination Structure

The First FRCR examination comprises two modules: Anatomy and Physics. Anatomy is examined by an image viewing session delivered on individual workstations and Physics by a multiple choice written question (MCQ) paper. Both modules are held during a two or three day examination period three times each year: normally in March, June and September. The two modules are each held on separate days.

A candidate may attempt the modules at the same sitting or at separate sittings and may pass them either together or separately in any order. A candidate will be deemed to have achieved success at the First FRCR once both modules have been passed.

From Spring 2015 no candidate will automatically be permitted more than six attempts at any FRCR examination or examination module. In order to attempt an examination or examination module for a seventh, or further, time candidates will have to demonstrate additional educational experience. Any examination or examination module a candidate has previously taken counts towards his or her six attempts i.e. the rule is backdated to include previous attempts.

2 Entry Requirements

Applicants need to hold a formal clinical radiology training post in which they are actively receiving clinical radiology training (or to have held such a post in the past) in order to enter the First FRCR examination. No minimum period of clinical experience or clinical radiology training is required in order to enter. No confirmation of course attendance is required. Candidates undergoing specialty training in the UK require the signature of their Training Programme Director (TPD) on their application form each time they attempt the examination in order to confirm that the number and combination of modules to be taken are appropriate.

No exemption is granted from the First FRCR examination on the basis of success in any other examination.

3 Candidate Numbers

The purpose of the examination is to provide a national assessment mechanism for those undergoing formal specialist training in clinical radiology in the UK, however the College appreciates that other radiologists wish to obtain the First FRCR examination for their own purposes. The number of applicants has risen significantly since the introduction of the examination, and in order to safeguard the quality and consistency of the assessment the College operates a cap on the number of Anatomy module candidates that can be accommodated across all venues.
Candidates who are undergoing formal specialist training in the UK are guaranteed a place at the Anatomy module. Overseas trained candidates will be offered places not taken by UK trainees via a ballot system following the application closing date.

There is no cap on the number of candidates attempting the Physics module.

4 Physics Module

4a Venues

The examination is held at three UK venues (Birmingham, London and Manchester) and three non-UK venues (Dublin, Hong Kong and Singapore).

4b Content

The Physics MCQ paper comprises 40 questions. Candidates are given two hours to answer the paper. Candidates must write their candidate number in the space provided on the MCQ paper and record answers on a separate answer sheet using a HB pencil. Further instructions about completing the answer sheets are provided at examination venues. Candidates must not attempt to copy any examination materials or remove either the question paper or the answer sheet from the examination room; both must be returned to the invigilator at the end of the examination.

Each question comprises a stem (a question or statement) and five items (answers) labelled (a) to (e). Candidates are asked to determine whether each item is true or false. There is no restriction on the number of true or false items in a question. It is possible for all five items to be true or for all to be false. The examination is not negatively marked and therefore candidates are encouraged to offer an answer to all questions.

Sample questions and a copy of the Physics answer sheet are available to give candidates the opportunity to familiarise themselves with question styles and examination materials in advance of the examination.

4c Marking

The Physics module is marked by computer. The marking system shown below is used:

For each item correctly answered +1 mark
For each item incorrectly answered 0 marks

The standard for success is determined at each sitting based on the difficulty of the questions (using a criterion-referenced standard setting technique) and so may vary between sittings.

5 Anatomy Module

5a Venues

The examination is held at one UK venue (London) and two non-UK venues (Hong Kong and Singapore).

5b Content

The Anatomy image viewing module comprises 100 images and associated questions. A single structure on each image will be indicated by one or more arrows with a single question on that structure. Candidates are given 90 minutes to answer the questions and record their answers in the question booklet provided.
Further instructions about viewing the examination images are provided via an instructional video which is shown to candidates in the waiting area prior to entering the examination room. Candidates must not attempt to copy or make notes about examination materials or remove the question booklet from the examination room; this must be returned to the invigilator at the end of the examination. Candidates will be provided with writing equipment.

The examination is not negatively marked and therefore candidates are encouraged to offer an answer to all of the questions.

In addition to the instructional video, ‘still’ sample images and a copy of the Anatomy answer sheet are available to give candidates the opportunity to familiarise themselves with question styles and examination materials in advance of the examination.

5c Equipment and Software

Each workstation comprises a 21.5" Apple Mac Core i5 and a mouse (right click disabled) but not a keyboard. Images are viewed using Osirix software, which can be downloaded for free for use on Apple computers. The Osirix software will not run on a PC, however PC users can download Philips PMSDview software, which has similar functionality and can display DICOM images.

The Osirix software provides a simple image viewing window and the ability to move through images. Candidates are given instructions on the use of the software via the instructional video, plus two practice images are provided prior to the start of the examination for familiarisation with the software and to practice moving between images.

Following the two practice images is the start screen. Candidates must not proceed beyond this screen until instructed to do so by the invigilators - candidates viewing the first examination image prior to the commencement of the examination risk being disqualified.

During the course of the examination, all screen activity on computer workstations is monitored and recorded centrally. If suspicious activity is identified on an individual workstation, it will be “locked” remotely and in order that the College can investigate further.

In the unlikely event of computer hardware or software failure during the examination, candidates should alert an invigilator by raising their hand – spare workstations are available if necessary.

5d Marking

The Anatomy module is marked by First FRCR examiners, all of whom are UK consultant radiologists. The marking system shown below is used:

- For each item answered with complete accuracy +2 marks
- For each item answered with less accuracy, but still correctly +1 mark
- For each item answered incorrectly 0 mark

More information on marking shows in the FAQs section. The standard for success is determined at each sitting based on the difficulty of the questions (using a criterion-referenced standard setting technique) and so may vary between sittings and sets of images.
6 Equipment Required for the Examination

Candidates are required to bring a HB pencil, pencil sharpener and eraser to the Physics examination. Writing equipment is provided for the Anatomy examination.

7 Personal Belongings and Items on Desks

Candidates must follow invigilators’ instructions at examination venues regarding where to leave personal belongings. No personal belongings are permitted in the examination room. Neither the Royal College of Radiologists nor any other examination venue is able to accept responsibility for the safety of any items of personal belongings. Apart from the equipment described above and official examination documentation, no other belongings or documents may be brought to desks or workstations.

Candidates must not bring any electronic equipment, eg laptop or palmtop computers, to the examination. All mobile telephones must be turned off for the duration of the examination and left in bags or coats. Candidates must turn off any alarm set on mobile telephones as these can operate even when the device is turned off; any timing device that emits an audible "beep" must have this facility disabled for the duration of the examination.

Candidates are permitted a still (non-carbonated) drink on their desks during the Physics module, but no food items. Candidates with special medical needs requiring them to eat throughout the Physics module should advise the College of this when submitting their application via a covering note.

Candidates are not permitted to bring drinks, or other refreshments or food items, into the Anatomy examination room to safeguard the electronic equipment from accidental damage. Candidates with special medical needs requiring them to eat and/or drink throughout the Anatomy module should advise the College of this when submitting their application via a covering note.

8 Candidate Identification

Candidates are required to bring their candidate timetable (which shows their candidate number and details of when/where they are sitting the examination) to the examination, together with a form of identification that bears the candidate’s photograph, full name and signature. Candidates that are not registered with the General Medical Council must bring their passport. Details on identification documents must match those supplied on the examination application form.

9 Examination Results

The list of successful candidates, both overall and by module for those candidates who were not successful, will be published on the College website. Results will not be available by telephone or fax. All candidates will be sent a letter confirming examination results (by first class or air mail) as soon as possible after the results have been published.

Pass list publication dates can be found on the website - this information will also be included on individual candidate timetables that are sent out as soon as possible after the application closing date.
10 Information Provided to Unsuccessful Candidates

Unsuccessful candidates will receive details of scores achieved in each module and the level of performance that was required to achieve success. Candidates undertaking specialty training in the UK will have their results letter copied to the relevant TPD and Regional Education Adviser (RA) for information.

11 Candidate Conduct

Candidates are expected to behave in a reasonable and respectful manner throughout all College examinations. Candidates must comply with the instructions and requirements of the examination invigilators, College staff and examiners at all times. Please note the following:

- Candidates attempting to make a copy of, or transmit, any examination materials will be disqualified. This includes writing details of the cases shown.
- Candidates found with any electronic device during the examination will be disqualified.
- Candidates refusing to stop writing on or amending their answer sheets after the examination has ended will be disqualified.

12 Further Information

Queries arising from this document should be addressed to the College’s Examinations Office, either by email to examinations@rcr.ac.uk or by telephone on 020 7406 5905.

Queries at the time of the examination should be raised with the invigilators or College staff present.

Comments, feedback or complaints following the examination should be brought to the attention of the Examinations Manager, either by email to laura_mcgarry@rcr.ac.uk or by telephone on 020 7406 5947.
