Trainee workshop: Everything a diagnostic imager needs to know about interventional radiology

16:40–18:30

Trainee workshop: Everything a diagnostic imager needs to know about interventional radiology

Dr Rashid Akhtar, Dr Tim Fotheringham, Dr Jimmy Kyaw Tun and Dr Debbie Low, Barts Health NHS Trust, London

Learning points

Be able to better assess pre- and post-procedure diagnostic imaging related to interventional radiology including recognising complications following intervention.

Have a better understanding of what common interventional radiology procedures entail as well as their indications and contraindications.

Know when to contact interventional radiology directly about pathology seen on imaging including recognising acute haemorrhage.

Apply new found knowledge of tips and tricks to everyday procedural practice including biopsies and drainages.
