Patient unique identifier:

Possible late or long-term side-effects

May happen many months or years after radiotherapy and may be permanent.
Frequencies are approximate.

Definite 100%	<p>This is important. If your uterus (womb) and/or ovaries are in the treatment field, please let us know about your plans for having children and we can advise accordingly.</p> <p><input type="checkbox"/> Early menopause – symptoms of this may start during or shortly after radiotherapy. Egg and hormone production will stop.</p> <p><input type="checkbox"/> Infertility – you will be unable to carry a pregnancy in your uterus (womb) after radiotherapy, but you must use contraception during radiotherapy</p>
Expected 50%–100%	<p><input type="checkbox"/> Vaginal narrowing, shortening or dryness – this may impact on sexual function and comfort during examination. You may be advised to use vaginal dilators after treatment which may reduce this risk.</p>
Common 10%–50%	<p><input type="checkbox"/> Urinary frequency (passing urine more often than normal) and urgency (a sudden urge to pass urine)</p> <p><input type="checkbox"/> Urinary incontinence – including urine leaking when coughing or straining</p> <p><input type="checkbox"/> Bowel frequency (opening your bowels more often than normal) and urgency (a sudden urge to open your bowels)</p> <p><input type="checkbox"/> Looser stools compared to normal</p> <p><input type="checkbox"/> Asymptomatic pelvic bone fractures particularly in post-menopausal women</p> <p><input type="checkbox"/> Radiotherapy to the lower pelvis/vulva</p> <ul style="list-style-type: none">– Hair loss in treatment area– Lymphoedema – (fluid build-up) in your legs or pubic area– Skin thickening or discoloration lighter, darker or visible blood vessels– Skin thinning
Less common Less than 10%	<p><input type="checkbox"/> Cystitis/pain when you urinate</p> <p><input type="checkbox"/> Reduced bladder capacity</p> <p><input type="checkbox"/> Rectal pain/discomfort</p> <p><input type="checkbox"/> Faecal discharge/soiling</p> <p><input type="checkbox"/> Bleeding from your bladder or bowel or vagina</p> <p><input type="checkbox"/> Bowel/bladder damage which may require surgery – due to stricture (narrowing), fistula (abnormal connection between two parts of your body) and may require stoma formation</p> <p><input type="checkbox"/> Duodenal ulceration</p> <p><input type="checkbox"/> Symptomatic pelvic bone fractures particularly in post-menopausal women</p> <p><input type="checkbox"/> Kidney impairment</p> <p><input type="checkbox"/> Malabsorption – problems with nutrient absorption</p> <p><input type="checkbox"/> Hair loss in treatment area</p> <p><input type="checkbox"/> Lymphoedema – (fluid build-up) in your legs or pubic area</p>
Rare Less than 1%	<p><input type="checkbox"/> Skin thickening or discoloration lighter, darker or visible blood vessels</p> <p><input type="checkbox"/> Urinary strictures – narrowing of tubes running from kidneys and bladder</p> <p><input type="checkbox"/> A different cancer in the treatment area</p>
Specific risks to you from your treatment	
<p>I confirm that I have had the above side-effects explained.</p>

Statement of health professional

(to be filled in by health professional with appropriate knowledge of proposed procedure)

- I have discussed what the treatment is likely to involve, the intended aims and side-effects of this treatment.
- I have also discussed the benefits and risks of any available alternative treatments including no treatment.
- I have discussed any particular concerns of this patient.

Patient information leaflet provided: Yes / No – Details: _____

Copy of consent form accepted by patient: Yes / No

Signature:

Date:

Name:

Job title:

Statement of patient

- I have had the aims and possible side effects of treatment explained to me and the opportunity to discuss alternative treatment and I agree to the course of treatment described on this form.
 - I understand that a guarantee cannot be given that a particular person will perform the radiotherapy. The person will, however, have appropriate expertise.
 - I have been told about additional procedures which are necessary prior to treatment or may become necessary during my treatment. This may include permanent skin marks and photographs to help with treatment planning and identification.
- I agree that information collected during my treatment, including images and my health records may be used for education, audit and research. All information will be anonymised. I am aware I can withdraw consent at anytime.

Tick if relevant

- I confirm that there is no risk that I could be pregnant.
- I understand that I should not become pregnant during treatment.

Note: if there is any possibility of you being pregnant you must tell your hospital doctor/health professional before your treatment as this can cause significant harm to an unborn foetus.

- I understand that if I were to continue to smoke it could have a significant impact on the side-effects I experience and the efficacy of my treatment.

- I do not have a pacemaker and/or implantable cardioverter defibrillator (ICD). or
- I have a pacemaker and/or implantable cardioverter defibrillator (ICD) and I have had the risks associated with this explained to me.
