

HEE South London and South East

South London, Kent, Sussex and Surrey Clinical Oncology Training Programme

Excellent opportunities arise in clinical experience and research for you to develop the competencies in becoming a consultant clinical oncologist. The rotations provide a variety of posts at different sites for you to develop experiences in different learning environments. Our aim is to provide you with a clear 5 year programme of allocation.

The rotations include:

<u>North West London, South West London, Surrey and Sussex</u>	<u>South West London, South East London, Surrey and Kent</u>
<p><u>18 months: Surrey or Sussex</u> <u>42 months: Central</u></p>	<p><u>18 months: Surrey or Kent</u> <u>42 months: Central</u></p>
<p>Imperial (St Marys, Charing Cross and Hammersmith)</p> <p>The Royal Marsden Hospital (London and Surrey)</p> <p>The Royal Surrey County Hospital, Guildford</p> <p>The Royal Sussex County Hospital, Brighton</p>	<p>The Royal Marsden Hospital (London and Surrey)</p> <p>Guys and St Thomas's Hospitals</p> <p>The Royal Surrey County Hospital, Guildford</p> <p>Kent Oncology Centre, Maidstone General Hospital</p> <p>Kent Oncology Centre, Kent and Canterbury Hospital</p>

During your oncology training across your rotation you will attain competencies in the delivery of systemic therapies and novel new agents, advanced radiotherapy techniques (intensity modulated radiotherapy, stereotactic radiotherapy, brachytherapy, image guided radiotherapy with the advent of MR Linac treatments) in common and rare cancers. You will also have a broad experience in clinical trials. Across all the cancer centres, educational and research opportunities arise for trainees with excellent infrastructure to support you.

Alongside your day to day training, there are clear local teaching sessions across all disciplines and 3 regional training days. In addition all ST3-ST4 trainees have mandatory training on the MSc course run by the Institute of Cancer Research to support you with the FRCR and also you are supported to submit your dissertation to attain your MSc. In addition there is a London wide FRCR Part 2 training course tailored for the examinations.

There is close supervision of your training with an appointed educational supervisor and support from fellow senior oncology SpRs. For further information, please do not hesitate to contact us:
